

Drive solutions

for assembly and logistics processes

- Automated transport systems
- Flexible industrial automation
- Innovative direct drives

We are a medium-sized company based in Saxony, Germany, developing **innovative direct drive systems** for the automotive sector.

We use our many years of experience to realize **innovative, automated, efficient and long-term reliable transport systems**.

Our transport systems, drive, and control technology are already successfully deployed at more than 40 locations in 11 countries on 5 continents.

Beldrive transport systems offer a **very high degree of automation** with **maximum flexibility**. The transport systems can be equipped with comprehensive **communication modules** to support the analysis, **optimization and improvement** of on-site processes.

Our **advantages** for your **benefit**:

- automation of assembly and logistics processes
- high torque: immediate access to maximum power
- automated transport of light and heavy loads
 - smooth acceleration and braking
 - high personal and facility safety
 - long-term reliability

Ideas in motion
